zone™ 
architectural products

From concept to closeout, Tepromark Architectural Wall Protection focuses on the needs of healthcare, hospitality and educational interior wall surfaces. Our experienced team is ready with the information, tools and products necessary to find the best solution for your facility.

Tepromark more than meets the industry-specific needs of today. From updated profiles and a fresh colour palette, to simplifying specification and installation, Tepromark offers the product and experienced service that inherently has you covered.

ZONE supply the Tepromark brand of wall protection in New Zealand and have over 10 years experience of successful supply and installation project history. We stock a range of bumper profiles, and flat wall protection sheet in a range of popular colours.

Our team offer a specification service and can arrange installation across the country. If we don't have the colour you want in stock, we can source that for you. Zone can assist with custom colour matching and can cut to length if required.

Corner Guards & Corner Protectors

Premium rigid high impact protection for exposed, vulnerable corners.

Available in stainless steel, clear and paintable profiles.

- High Impact Surface Mounted Corner Guards
- Stainless Steel Corner Protectors (Custom Length)
- High Impact Corner Protectors
- Paintable High Impact Corner Protectors

Crash Rails & Handrails

Our high impact crash rails offer maximum strength to protect walls from impact damage and wear caused by moving objects. Handrails feature secure grip, excellent strength, and compliant, with superior protection from impact.

- Crash Rails / Bumper Guards
- Triangular Bumper Guards

Wall Sheet Protection

Offering excellent impact, stain, and chemical resistance.

- Tested to EN13501-2007, (B, s3, D0), achieves NZ Group 1 fire rating (1.5mm only)
- Outstanding impact resistance, rigidity and heat deflection temperature
- Non PNC, no VOC adhesive, thermoformable
- Fungal and bacterial resistant to ATSMG-21 and G-22
